## Program Description

The Bridging Program for Internationally educated nurses (BPIEN) is designed to help internationally educated nurses (IENs) to bridge the gap between their nursing education and experiences with Canadian Nursing, clinical, and non-clinical workplaces.

In this program, IENs will gain knowledge about the Canadian Health care system, the Canadian Nursing professions, licensing requirements, and available education and career pathways. Emphasis will be put on concepts such as safe and ethical practice, cultural safety, and the entry-level Canadian nursing competencies through various student-centered learning activities such as quizzes, case studies, Online discussions, simulated practice, projects, and community service-learning activities (aligned with the current COVID-19 public health restrictions).

## What can I do with a Certificate in Nursing?

Graduates of this program can pursue careers in healthcare and community care sectors. You can enter the workforce with the aim of gaining continuing employment in the Canadian healthcare environment. You can be employed in non-regulated professions across many public and private organizations, including hospitals, clinics, primary care centers, public health centers, home care, assisted living, long-term care, schools, daycares, universities, and community support organizations and social services.

\*This program is not designated and ineligible to receive foreign nationals on a study permit.

\*This program is not approved, affiliated, or associated with CARNA, CLPNA, or NNAS. \*CIC encourages all IEN to complete the NNAS/CARNA/CLPNA application processes and follow the regulated recommendations by the federal and provincial regulatory bodies in Alberta, Canada for licensing, registration or practice as a registered nurse in Alberta.

At Canadian Imperial College we are in the business of *opening possibilities* and creating opportunities.
