## What can I do with a credential in the Certified Optical Network Associate (CONE) program?

Graduates of this program will gain the knowledge and technical skills required to work in the telecommunications and networking industry across Alberta and beyond. The program provides hands-on training in optical fiber technology, installation, testing, and maintenance, preparing graduates for careers with internet service providers,

data centers, and organizations that rely on advanced networking infrastructure.

Want Corporate Training or more personalized training? Contact info@canadianimperial.ca for your specific needs.

Program Description

Certified Optical Network Associate (CONA) training is designed to benefit both newcomers and early-career professionals who want to build a strong foundation in optical networking practices and methods.

This program is funded to equip participants with the essential skills required to succeed as optical network specialists in the telecommunications and data industries. Core competencies include installing and terminating fibre optic cables, understanding and applying safety standards, ensuring compliance with industry regulations, conducting inspections and troubleshooting, and mastering the use of specialized tools such as the Optical Time Domain Reflectometer (OTDR).

Participants will also gain skills in network infrastructure design, customer support, documentation, and effective time management, while developing the technical confidence to handle real-world networking challenges with precision and creativity.
